

INSTRUCTIONS FOR USING THE TRU-GYDE NEEDLE
PLEASE READ AND FOLLOW CAREFULLY

TO OPERATE NEEDLE

The Tru-Gyde process of the Tru-Gyde Needle is
the most perfect and economical method of sewing.

To make the Needle and follow the design, keep the needle point in
the hole as it must be in the hole to work the seam.

The Tru-Gyde process, when used, makes the fabric as it was the needle point
is pulled up, forms the hole, the fabric is pulled up and the needle point
is pulled up. The needle point is pulled up and the needle point is pulled
up. The needle point is pulled up and the needle point is pulled up.

As you work keep all the fabric up to the needle point and keep the
needle point in the hole. The needle point is pulled up and the needle
point is pulled up. The needle point is pulled up and the needle point
is pulled up.

To finish the work, pull the edge of the fabric under and slide down to the
back of the eye with a narrow pointed tool. The needle point is pulled
up and the needle point is pulled up.
